of the Earth's key physical and human processes and how they are in constant change. As pupils progress, their growing knowledge about the world should help them to deepen their understanding of the interaction between physical and human processes, and of the formation and use of landscapes and environments. Geographical knowledge, understanding and skills provide the frameworks and approaches that explain how the Earth's features at different scales are shaped. interconnected and change over time.															hical Inf																				aphs an		wr
